### Welcome to Kent Structural & Architectural Ltd

We are a company that specialises in Structural steel, Architectural and Bespoke fabrications. What sets us apart from all other fabrication companies is the ability to manage the project from the design stage through to the final product. We have a vast range of Engineering experience, from Marine projects to Sculptures

Whatever your project, we can deliver a high quality professional Service every time. We have access to all the solutions you require and can provide a turn-key package if required.

## Our Services

### Survey

We have experience in many fields of surveying, whether you require simple levels or a full Topographic survey, we can then translate this data into technical drawings or a complete 3d model for your presentation.

### Engineer

We can develop your projects using cost effective engineering principles, utilising our combined experience and knowledge of a vast range of disciplines to create solutions that align with your budget and deadlines.

### Design

We can cater for all design needs from small fabrications to large Portal frame buildings. We utilise the very latest Structural design packages and 3d visualisation tools, so you can optimise your design and create the fit for function philosophy everytime.

### Fabrication

We have a dedicated team of fabrication, platers and welders who aim to deliver the product you require in the time scale you need. Every project gets the same devotion and attention, that is evident in the final product that gets delivered on time, all the time.

### Site Specific Requirements

We hold all relevant certification and can conform to the following requirements;

- CSCS
- CCNSG
- CONFINED SPACE
- APPOINTED PERSON
- EUSR

All work considered Nationwide
